

For Sharp, the kitchen is the heart of every home. /This is Why we have created a unique 4-door fridge with a bottom freezer and a special ice cube maker.

Plasmacluster technology

To clean the air inside the fridge and to efficiently remove mold spores, germs and odours we have decided to equip our fridges with Plasmacluster technology - a patented solution from Sharp - initially applied in advanced air purifiers only.

Main features

- Energy class A+
- Gross capacity: 678 liter
- Door made of stainless steel with an attractive design
- User friendly control panel for fridge and freezer functions
- LED lighting in both compartments - fridge and freezer
- Sophisticated door handleless built into the door surface
- Good materials upgrade the overall quality

Unique solutions

- Plasmacluster technology
- Hybrid Cooling system in the fridge compartment ensures reduced drying. Foods kept in the fridge not only remain fresh and tint but the taste quality
- No Frost system in the freezer compartment
- Express freezing
- Unique ice cube maker with a system that does not reduce the free space in the freezer compartment.
- Radial cooling in the fruit and vegetable tray
- Big capacity compared to other models of the same external dimensions.
- Maintenance free HoneyComb deodorizer
- Unique door opening system - improving the cavity tightness and operation time of mechanical parts

Low operation costs

- Energy save mode
- Door open alarm

TECHNOLOGIES APPLIED IN OUR FRIDGES POSITION THEM AMONG HIGH END PRODUCTS

SPECIFICATIONS

Model	SJ-FP810V-BE
Gross capacity	678 liter
Net capacity	605 liter
Energy class	A+
Plasmacluster system	Yes
Cooling system in the fridge compartment	Hybrid Cooling system
Cooling system in the freezer compartment	No Frost/fan
External dimensions with handles (mm)	890 x 1830 x 771 (W x H x D)
External dimensions without handles (mm)	890 x 1830 x 771 (W x H x D)
Net weight in kg	107
Door surface colour	Beige

TYPE

Free-standing type

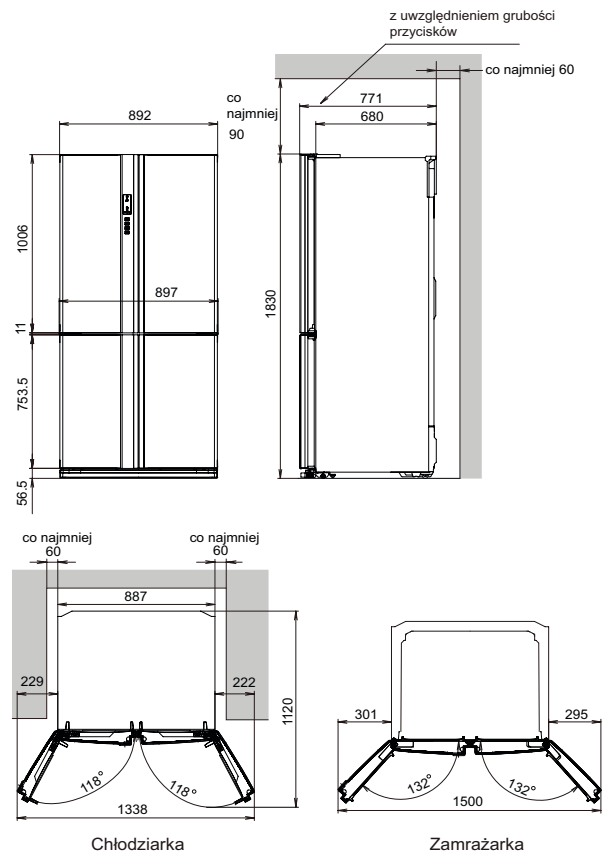

To ensure the proper ventilation, please leave at least 6 cm of free space on the left, right and rear side of the fridge and 9 cm above it.

- The fridge can be used at the external temperature within +5°C and +38°C range. It should not be stored at the temperature below -10°C during the extended period of time.
- The rated voltage changes in the line used for powering the fridge should not exceed +/- 6%.
